

ACCELERATED COST REDUCTION PROGRAM

Driving Immediate Savings And Lasting Value

In today's competitive environment, finance and procurement leaders are under constant pressure to optimise costs without compromising quality or service delivery. Harley Reed's Cost Reduction Service helps you unlock hidden savings across your procurement spend—swiftly and sustainably. Leveraging advanced analytics, deep procurement expertise, and an innovative, risk-free fee model, we deliver the savings you need to fuel growth and build resilience.

Why Focus On Tactical Cost Reduction

- **Immediate Financial Impact:** Achieve quick wins that enhance cash flow, support strategic initiatives and reinvest in core business areas.
- **Scalable & Flexible:** Our proven toolkit—from spend analysis to supplier negotiations—can be scaled to your needs, ensuring alignment with your strategic objectives.
- **Enhanced Competitiveness:** Lower operational costs, stronger supplier relationships, and improved processes position your organisation for long-term success.

Key Highlights

Performance-based fees:

Our compensation is directly tied to the savings we achieve for you - if we do not identify savings, our service is free. No hidden fees, no surprises—just results.

Deep Procurement Expertise:

Our team brings extensive strategic sourcing, category management, and negotiation experience.

Technology-Driven Insight:

We leverage leading-edge spend analytics to pinpoint hidden opportunities and run auctions and competitive processes for sustainable results.

Supplier Discovery:

Beyond your existing supplier base, we identify and vet new suppliers to spark innovative cost-saving opportunities.

Proven Track Record:

Building on Harley Reed's heritage in strategic procurement, we consistently deliver bottom-line impact for clients worldwide.

Our Approach

1. Spend Diagnostics & Analytics

We start by diving deep into your spend data—consolidating and classifying expenses to identify cost drivers and high-potential savings categories. Our technology tools provide real-time insights that guide us toward opportunities quickly and accurately.

2. Opportunity Assessment & Strategy

Next, our experts benchmark your spend categories against industry standards, refine sourcing objectives, and develop a tailored cost reduction strategy. We prioritise quick wins and high-impact categories to generate immediate ROI.

3. Supplier Discovery & Competitive Sourcing

We go beyond traditional supplier lists, leveraging our global network and advanced tools to identify alternative suppliers and disrupt complacent market

conditions. Through techniques such as e-auctions and well-structured RFP processes, we ensure genuine competition and transparency in negotiations.

4. Implementation & Negotiation

Working alongside your procurement team, we execute sourcing events and take negotiations to the finish line—securing optimal contract terms, improved service levels, and risk mitigation for the long run.

5. Savings Validation & Performance Management

Our partnership doesn't end at contract award. We measure and validate actual savings against targets, ensuring real bottom-line impact. Regular performance reviews and supplier performance management help lock in savings and highlight continuous improvement opportunities.

A Partnership Built On Shared Success

Fee Based on Real Savings

At Harley Reed, we stand by the quality of our work. Our unique model ties our fees to the savings we identify for your organisation—if you realise no savings, you pay nothing. This risk-free approach aligns our incentives with your success, driving an uncompromising focus on results.

Deep Expertise Meets Innovative Tools

Unlike many cost-reduction consultancies, we harness the power of data analytics and cutting-edge e-sourcing solutions. By automating routine processes and uncovering hidden patterns in your spend, we deliver faster outcomes and robust savings. This blend of human expertise and technology sets us apart in the industry.

Beyond Traditional Sourcing

Where necessary, our team can support broader procurement transformation initiatives such as contract optimisation, process redesign, and supplier relationship management. We believe tactical cost reduction should be a stepping stone to lasting operational excellence and strategic growth.

Benefits At A Glance

- **Risk-Free Engagement Model**
Pay only when savings are realised—true alignment to your business goals.
- **Rapid Return on Investment**
Tactical measures and quick-win categories deliver fast, measurable results.
- **Increased Competition & Innovation**
Our supplier discovery approach and e-auction tools drive true market engagement.
